Independent Auditors' Review Report

(112) Cai-Shen-Bao-Zi No. 23000281

To YUAN High-Tech Development Co., Ltd.,

Introduction

The Balance Sheet as of March 31, 2023 and 2022, the Comprehensive Income Statement, the Statement of Changes in Equity and Cash Flow Statement for the period from January 1 to March 31, 2023 and 2022, as well as the Notes to the Financial Statements (including a summary of major accounting policies) of YUAN High-Tech Development Co., Ltd., have been reviewed by us. Management is responsible for the preparation and fair presentation of the financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 Interim Financial Reporting as endorsed by the Financial Supervisory Commission (FSC). Our responsibility is to express a conclusion on the financial statements based on our reviews.

Scope

The accountants conducted the audit in accordance with R.O.C. Audit Standards No. 2410 "Review of Financial Statements". A review of the financial statements consists of making inquiries, primarily to persons responsible for financial and accounting affairs, and applying analytical and other review procedures. Since the scope of review is substantially less than that of audit, we might not be fully aware of all material matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusions

According to our review results, we have determined that the foregoing financial statements have been prepared in all material respects in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 Interim Financial Reporting as endorsed and issued by the Financial Supervisory Commission (FSC), with a fair presentation of the financial position as of March 31, 2023 and 2022, the financial performance and the cash flows for the period from January 1 to March 31, 2023 and 2022 of YUAN High-Tech Development Co., Ltd.

IV. Summary of Significant Accounting Policies

The main accounting policies adopted in the preparation of this financial report are described below. Unless otherwise stated, these policies apply consistently throughout all reporting periods.

(I) Statement of Compliance

This financial report has been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IAS 34 Interim Financial Reporting as endorsed and issued by the FSC.

(II) Basis of Preparation

1. Except for the following important items, this financial report is prepared at historical cost:

A defined benefit liability is recognized as the net value of the pension fund assets minus the present value of the defined benefit obligation.

2. The preparation of financial report in compliance with International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations, and SIC Interpretations (collectively referred to as "IFRSs") endorsed and issued by the FSC requires the use of certain significant accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. Please refer to Note V for items involving in a higher degree of judgment or complexity or items involving in

significant assumptions and estimates to the financial report.

(III) Translation of foreign currency

The items presented in the financial report of the Company are measured at the currency (i.e., functional currency) of the main economic environment in which the Company operating. This financial report is presented in the functional currency of the Company, New Taiwan Dollar.

Transaction in foreign currencies and balances

1. Transaction in foreign currencies are translated into functional currencies at the spot exchange rate on the trading day or the measurement date, and the translation differences generated by such transactions are recognized as profit or loss for the current period.
2. The balance of monetary assets and liabilities in foreign currencies shall be evaluated and adjusted according to the spot exchange rate on the balance sheet date, and the translation differences generated by such adjustment shall be recognized as profit and loss for the current period.
3. If the balance of non-monetary assets and liabilities in foreign currencies is not measured at fair value, it shall be measured at the historical exchange rate of the initial trading day.
4. All other exchange gains and losses shall be presented under "Other gains and losses" in the Income Statement.

(IV) The classification criteria for assets and liabilities whether are current or non-current

1. An asset that meets any of the following conditions shall be classified as current asset:
 - (1) The asset is expected to be realized, or intended to be sold or consumed in the normal operating cycle;
 - (2) The liability is held primarily for trading purposes;
 - (3) The asset is expected to be realized within 12 months after the balance sheet date; and
 - (4) The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to pay off a liability at least 12 months after the balance sheet date.

The Company classifies all assets that do not meet the foregoing conditions as non-current.

2. A liability that meets any of the following conditions shall be classified as current liability:
 - (1) The liability is expected to be paid off in the normal operating cycle;
 - (2) The liability is held primarily for trading purposes;

- (3) The liability is expected to be paid off within 12 months after the balance sheet date; and
- (4) The liability of which the settlement term cannot be deferred unconditionally to at least 12 months after the balance sheet date. However, the terms of a liability which may result in the settlement of an equity instrument at the option of the counterparty will not affect its classification.

The Company classifies all liabilities that do not meet the foregoing conditions as non-current.

(V) Cash equivalents

Cash equivalents refer to short-term investments with high liquidity that can be converted into fixed amount of cash at any time with little risk of change in value. Time deposits that meet the foregoing definition and are held for the purpose of meeting short-term cash commitments in operation are classified as cash equivalents.

(VI) Accounts and notes receivable

1. Accounts and notes receivable refer to the accounts and notes which have the right to unconditionally receive the consideration for the transfer of goods or services in accordance with the contract.
2. The Company measures the short-term accounts and notes receivable without interest paid at the original invoice value, due to the little effect from discount.
3. The Company's expected factoring receivables are operated for the purpose of selling, and shall be measured at fair value subsequently, with changes recognized as profit and loss for the current period.

(VII) Impairments of financial assets

At each balance sheet date, the Company, taking into account all reasonable and verifiable information (including forward-looking information) regarding financial assets measured at amortized cost, and accounts receivable with material financial components, measures the loss allowance by the expected credit loss in 12 months for those without credit risk increased significantly since the initial recognition, and measures the loss allowance by the expected credit loss during the duration for those with credit risk increased significantly since the initial recognition. For accounts receivable that do not contain a material financial component, the Company measures the loss allowance by the expected credit loss during the duration.

(VIII) Derecognition of financial assets

The Company will derecognize a financial asset if:

1. The contractual rights to receive cash flows from the financial asset expire.
2. The Company transfers the contractual rights to receive cash flows from the financial asset and virtually has transferred all the risks and rewards of the ownership of the financial asset.

3. The Company transfers the contractual rights to receive cash flows from the financial asset without retaining control over the financial asset.

(IX) Lessor's lease transaction - operating lease

The deduction of any inducement given to the lessee from the lease income of an operating lease shall be recognized as the current profit or loss by the straight-line method during the lease term.

(X) Inventories

Inventory shall be measured at the lower of cost or net realized value, and the cost is determined by weighted average method. The costs of finished goods and work in process include raw materials, direct labor, other direct costs and manufacturing overhead related to production, but does not include borrowing costs. The item by item comparison method is adopted for the lower of cost and net realized value. The net realized value refers to the balance of the estimated selling price in the normal course of business minus the estimated cost to be invested until completion and estimated costs required to complete the sale.

(XI) Property, plant and equipment

1. Property, plant and equipment are accounted for on the basis of acquisition cost.
2. Subsequent costs are included in the asset's carrying amount or recognized as separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replacement shall be derecognized. All other maintenance costs shall be recognized as current profit or loss when incurred.
3. Property, plant and equipment shall be subsequently measured by the cost model, and shall be depreciated by the straight-line method based on the estimated service life except for land. If each item of property, plant and equipment is material, it shall be depreciated separately.
4. The Company reviews each asset's residual values, service lives and depreciation methods at the end date of each fiscal year. If expected values of residual values and service lives differ from the previous estimates or there has been a material change in the expected consumption pattern of the future economic benefits contained in the asset, it shall be treated in accordance with the provisions of the IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors for changes in accounting estimates since the date of the change. The service life of each asset is as follows:

Machinery equipment	2 to 5 Years
Transportation equipment	5 Years
Office equipment	2 to 5 Years
Lease improvement	2 Years

(XII) Lessee's lease transaction - right-of-use assets/lease liabilities

1. The leased assets shall be recognized as the right-of-use assets and lease liabilities on the date when they are available to the Company. When the lease contract is a short-term lease or a lease of an underlying asset of low value, the lease payment shall be recognized as expense during the lease period by straight-line method.
2. The lease liabilities shall be recognized at the present value of the unpaid lease payments at the commencement date of lease discounted at the Company's interest rate on the increment loan. A lease payment is a fixed payment minus any lease inducement that may be received.

The lease liabilities shall be measured by the interest method and the amortized cost method subsequently, and the provision for interest expense shall be made during the lease term. When the lease term or lease payment changes not due to the contract modification, the lease liability will be reassessed and the remeasurement amount will be adjusted to the right-of-use asset.

3. The right-of-use assets shall be recognized at cost on the commencement date of lease, and the cost shall include:
 - (1) The initial measurement amount of the lease liability;
 - (2) Any lease payment paid on or before the commencement date.

The right-of-use assets shall be measured by the cost model subsequently, and the provision for depreciation expense shall be made on the earlier of the expiry date of the asset's service life or the expiry date of the lease term. When the lease liability is reassessed, the right-of-use assets will be adjusted to any remeasurement of the lease liability.

4. For a lease modification that reduces the scope of the lease, lessee will reduce the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize the difference between the carrying amount and the remeasurement amount of the lease liability in the profit and loss.

(XIII) Investment properties

Investment properties shall be recognized at acquisition cost, and measured by the cost model subsequently. Except for land, investment property shall be depreciated by the straight-line method according to the estimated service life, which is 10-20 years.

(XIV) Intangible assets

Computer software

Computer software shall be recognized at acquisition cost, and amortized over an estimated service life of 1 - 5 years by the straight-line method.

(XV) Impairment of non-financial assets

On the balance sheet date, the Company estimates the recoverable amount of the assets with an indication of impairment, and recognizes the impairment loss when the

recoverable amount is lower than the book value. The recoverable amount refers to the fair value of an asset minus the cost of disposal or its use value, whichever is higher. When the impairment of an asset recognized in previous years does not exist or decreases, the impairment loss shall be reversed, provided that the increase in the carrying amount of the asset resulting from the reversal of the impairment loss shall not exceed the carrying amount of the asset after deducting depreciation or amortization if the impairment loss is not recognized.

(XVI) Loans

It refers to a short-term loan from a bank. At the time of initial recognition, the Company shall measure the loans by deducting transaction costs from their fair value, and shall subsequently recognize the interest expense in profit and loss during the current period according to the amortization procedure using the effective interest method for any difference between the price after deducting transaction costs and the redemption value in profit and loss.

(XVII) Accounts and notes payable

1. Accounts and notes payable are debts incurred for the purchase of raw materials, goods or services on credit and notes payable incurred either arising from business or not arising from business.
2. The Company measures the short-term accounts and notes payable without interest paid at the original invoice value, due to the little effect from discount.

(XVIII) Derecognition of financial liabilities

The Company derecognizes financial liabilities when its contractual obligations specified have been performed, canceled or due.

(XIX) Offsetting of financial assets and liabilities

The Company may offset the financial assets and financial liabilities against each other and present them net in the balance sheet only when it has a legally enforceable right to offset the recognized amount of financial assets and liabilities, and intends to close on a net basis or realize assets and pay off liabilities at the same time.

(XX) Liability provision

Provision for liabilities (including warranties and provisions for liabilities arising from litigation) shall be recognized when the Company has a current legal or constructive obligation arising from a past event, and it is likely that the Company will have to discharge resources with economic benefit in the future to fulfill the obligation, the amount of such obligation can be reliably estimated. The provision for liabilities shall be measured by the best estimated present value of the expenditure required to fulfill the obligation at the balance sheet date, with a pre-tax discount rate which reflects the current market assessment of the time value of money and the specific risk of the liability. The amortization of the discount shall be recognized as interest expense. No provision for liabilities shall be recognized for future operating losses.

(XXI) Employee benefits

1. Short-term employee benefits

Short-term employee benefits shall be measured at the undiscounted amount expected to be paid and shall be recognized as expenses when the services are provided.

2. Pension

(1) Defined contribution plans

For a defined contribution plan, the amount of the pension fund to be contributed shall be recognized as the current pension cost on an accrual basis. Contributions paid in advance shall be recognized as assets to the extent refundable cash or reduced future payments.

(2) Defined benefit plans

A. Net obligations under defined benefit plans shall be calculated by discounting the amount of future benefits earned by the employee from the current or past services, and by present value of defined benefit obligations less the fair value of plan assets at the balance sheet date. Net obligations under defined benefit plan shall be calculated on an annually basis by actuaries using the projected unit benefit method. The discount rate adopted shall be the market yield (at the balance sheet date) of government bonds in the same currency and period as the defined benefit plan at the balance sheet date.

B. The remeasurement amount generated by the defined benefit plan shall be recognized in other comprehensive income for the period in which it is incurred and expressed in retained earnings.

C. The pension cost for the interim period shall be calculated on the basis of actuarial pension cost rates as at the end date of the preceding fiscal year from the beginning to the end of the year. If there are material market changes and material reductions, liquidations or other material one-off events after such end date, the pension cost shall be adjusted and disclosed in accordance with the foregoing policy.

3. Employees compensation and remuneration to directors

Employees compensation and remuneration to directors shall be recognized as expenses and liabilities where there are legal or constructive obligations and the amounts can be reasonably estimated. If there is a difference between the actual amount distributed and the accrued amount resolved subsequently, it shall be treated as a change in accounting estimate. In addition, if employees compensation is issued in stock, the number of shares shall be calculated based on the closing price of the day prior to the resolution of the board of directors.

(XXII) Income tax

1. Income tax expense includes current and deferred income taxes. Income tax shall be recognized in profit and loss, except that income tax related to items included in other comprehensive income or directly included in equity shall be separately included in other comprehensive income or directly included in equity.

2. The Company shall calculate the current income tax on the basis of the tax rates that are legislated or substantially legislated at the balance sheet date by the country in which the Company operates and generates its taxable income. Management shall evaluate on a regularly basis the status of income tax returns in respect of applicable income tax regulations and, where applicable, estimate income tax liabilities based on the taxes expected to be paid to tax authorities. The expense of income tax imposed on undistributed earnings under the Income Tax Act shall not be recognized according to the actual distribution of undistributed earnings until the next year of the year in which the surplus is generated after the earnings distribution plan is approved by the shareholders' meeting.
3. Deferred income tax shall be recognized on the basis of temporary differences between the tax basis of assets and liabilities and their carrying amounts on the balance sheet, using the balance sheet method. Deferred tax is subject to the tax rate (and tax law) that is legislated or substantially legislated at the balance sheet date and is expected to apply at the time of realization of the relevant deferred tax asset or settlement of the deferred tax liability.
4. Deferred income tax assets shall be recognized to the extent that temporary differences are likely to be used to offset future taxable income, and the unrecognized and recognized deferred income tax assets shall be reassessed on each balance sheet date.
5. The Company shall offset the current income tax assets and current income tax liabilities against each other only when it has the legal enforcement power to offset the recognized current income tax assets and liabilities against each other and intends to repay them on a net basis or realize assets and pay off liabilities at the same time. The Company shall offset the deferred income tax assets and liabilities against each other only when it has the legal enforcement power to offset the current income tax assets and the current income tax liabilities against each other, and the deferred income tax assets and liabilities are generated by the same taxpayer, or by different taxpayers, levied by the same tax authority, provided that each taxpayer intends to repay them on a net basis or realize assets and pay off liabilities at the same time.
6. Unused income tax credits transferred in later period arising from research and development expenditure shall be recognized as income tax assets to the extent that future tax income is likely to be available for the use of the unused income tax credit.
7. Income tax expense for the interim period shall be calculated by the profit and loss before tax for the interim period applying the estimated annual average effective tax rate and shall be disclosed in accordance with the foregoing policy.

(XXIII) Share capital

1. Common stock is classified as equity, and the incremental costs directly attributable to the issuance of new shares or stock options shall be included as price deduction in equity with the net amount after deduction of income tax.
2. When the Company repurchases its outstanding shares, it recognizes the

consideration paid, including any directly attributable incremental costs, as a reduction of shareholders' equity on a net after-tax basis. When the repurchased shares are subsequently re-issued, the difference between the book value and the consideration received after deducting any directly attributable increment costs and income tax effects of the repurchased shares shall be recognized as an adjustment of shareholders' equity.

(XXIV) Dividend distribution

Cash dividends distributed to the Company's shareholders shall be recognized in the financial report when the dividends distribution are approved by resolution of the shareholders' meeting or by special resolution of the Board of Directors. Cash dividends distribution shall be recognized as liabilities, while stock dividends distributed to the shareholders of the Company shall be recognized as stock dividends to be distributed when the distribution is resolved at the Company's stockholders' meeting, and recognized as ordinary shares on the base date of issue of new shares.

(XXV) Recognition of revenue

1. Merchandise sales

- (1) The Company develops, manufactures and sells computer multimedia peripheral video converters, interface cards and other related products, and recognizes the sales revenue when the control of the products is transferred to the customer, that is, when the products are delivered to the customer, the customer has the discretion over the distribution and price of the products, and the Company has no outstanding performance obligations that may affect the customer's acceptance of the products. The delivery of products shall be deemed to have occurred only when the products are shipped to the designated location, the risk of obsolescence and loss has been transferred to the customer and the customer has accepted the products pursuant to the sales contract or there is objective evidence that all acceptance criteria have been met.
- (2) The sales revenue of computer multimedia peripheral video converters, interface cards and other related products shall be recognized according to the quantity of goods purchased by the customer and the price of item agreed upon. The terms of collection of sales transactions are agreed upon in accordance with the general commercial transaction model and the market practice, therefore, it is concluded that there is no material financial component to the contract.
- (3) Sales allowances granted to customers are generally calculated on a 12-month cumulative sales basis. The Company estimates sales allowances using the expected value approach based on historical experience. Revenue recognized is limited to the portion of the sales that is highly likely not to be materially reversed in the future and shall be updated on each balance sheet date. Estimated sales allowance payable to customer in relation to sales as at the balance sheet date shall be recognized as a refund liability. Payment terms for

sales transactions are usually 30 to 60 days due from the date of shipment. The Company will not adjust the transaction price to reflect the time value of currency if the time interval between the transfer of the promised goods to the customer and the payment by the customer has not exceeded one year.

- (4) The Company provides standard warranty for the products sold, shall be obligated to refund for product defects, and shall recognize liability provisions at the time of sales.
- (5) Accounts receivable shall be recognized when the goods are delivered to the customer, since the Company has an unconditional right to the contract price from that point on and can collect consideration from the customer only after the lapse of time.

2. Acquisition costs of customer contracts

The incremental costs incurred by the Company in obtaining the customer contracts are expected to be recoverable. However, as the contract period is less than one year, such costs shall be recognized as expenses when incurred.

(XXVI) Operating segments

Information about the Company's operating segments is reported in a manner consistent with internal management reports provided to principal operating decision maker. The principal operating decision maker is responsible for allocating resources to the operating segments and evaluating their performance. The principal operating decision maker of the Company is identified as the Board of Directors.

V. Major sources of uncertainty in major accounting judgments, estimates and assumptions

At the time of the preparation of this financial report, management has used its judgment in determining the accounting policies to be adopted and has made accounting estimates and assumptions based on reasonable expectations concerning future events according to the current conditions as at the balance sheet date. Significant accounting estimates and assumptions made that may differ from actual results will be continuously evaluated and adjusted taking into account historical experience and other factors. Such estimates and assumptions are subject to the risk of a material adjustment of the carrying amounts of assets and liabilities in the following fiscal year. The Company has taken into account the economic impact of the COVID-19 outbreak in its significant accounting judgments and will continue to evaluate the impact on its financial position and financial performance. Please refer to the following descriptions of the uncertainties in significant accounting judgments, estimates and assumptions:

(I) Significant judgments adopted for accounting policies

None.

(II) Significant accounting estimates and assumptions

Valuation of inventory

Since inventories are valued at the lower of cost and net realized value, the Company must use judgment and estimation to determine the net realized value of inventories at the

balance sheet date. Due to rapid changing technology, the Company evaluates the amount of inventory for normal wear and tear, obsolescence, or without market value at the balance sheet date and offsets the cost of inventory to net realized value. This inventory valuation is based primarily on product demand estimates for specific periods in the future and may be subject to material change.

As of March 31, 2023, the carrying amount of the Company's inventory is NT\$387,792.

Present

Cash flow and interest rate risks with fair value

- A. The main interest-bearing assets of the Company are cash (presented as "cash and cash equivalents"). As all the maturity dates are less than 12 months, there is no material risk of interest rate changes affecting the cash flow.
- B. The Company does not use any financial instruments to hedge its interest rate risk.

(2) Credit risk

- A. The credit risk of the Company is the risk of financial loss of the Company due to the failure of a customer or a counterparty of a financial instrument to fulfill its contractual obligations, which is mainly caused by the inability of the counterparty to repay the cash flow of accounts receivable payable on the terms of collection.
- B. The Company establishes credit risk management from a corporate perspective. In accordance with the stated internal credit policy, each of the Company's operating units shall carry out the management and credit risk analysis of each new customer before establishing the payment and delivery terms and conditions with such customer. Internal risk control is to assess the credit quality of customers by taking into account their financial position, historical experience, and other factors.
- C. The Company adopts IFRS 9 to provide the following assumptions as a basis for judging whether the credit risk of a financial instrument has increased significantly since the initial recognition:

When the contract payment is overdue for more than 30 days according to the agreed terms, it is deemed that the credit risk of a financial asset has increased significantly since the initial recognition.
- D. The Company adopts IFRS 9 to provide assumptions that if the contract payment is overdue for more than 90 days according to the agreed terms, it is deemed to have breached the contract.
- E. The Company groups the accounts receivable from customers according to the characteristics of customer ratings and customer types and adopts a simplified approach to estimate the expected credit losses based on a provision matrix.
- F. The Company adjusts the loss rate based on historical and current information for a specific period by taking into account the forward-looking considerations for the future to estimate the allowance for losses on accounts receivable. The reserve matrices as of March 31, 2023, December 31, 2022 and March 31, 2022 are as follows:
